

Alpha Support Belt

Light
Easy to use
High SWL

The Support Belt is part of a product range with a wide range of possible applications. This product is used in particular when raising and/or transferring clients in home care and other health care facilities and hospitals. It is a safe transfer aid, which allows for a pleasant and comfortable transfer for the client and being back-friendly and straightforward for the caregiver.

The interior of the Support Belt is lined with a non-slip material, so it clings to clothing, and vertical and horizontal grips make the handling easier. The robust outer material is made of nylon and prolongs the service life of the belt. This belt has a safe working load (SWL) of up to 200kg/440lb.
